

ADDITIONAL PERFORMANCE DATA

Dear Angus Customers: The bulls are currently running in a large pasture getting lots of exercise and interaction. They are **all fertility tested with Actual Scrotal Measurements.**

Included in this report is:

- 1) **174 Day ADG:** This is the **Average Daily Gain (ADG)** on the bulls for a period from **9-4-24 to 2-25-25** which is 174 Days. This operation uses a growing ration over a long period to better predict the performance and growth potential from weaning to yearling.
 - 2) **YR Adj. WT:** The yearling adjusted weight uses the Actual Weight taken on 2-5-25 to be calculated by the American Angus Association to obtain this value.
 - 3) **Ultrasound Analysis:** The bulls were done on 2-10-25 and the females on 2-28-25.
 - 4) **Final Weight and Height:** This report lists the actual weights and heights taken on 2-25-25. Heights are only accurate to a +/- (one inch) value.
 - 5) **In-Herd Comparison and HD 50K DNA tests:** Dam weights are taken annually in September to help predict mature weight, mature height and \$EN EPDs on the sale cattle. All cattle have HD 50K DNA tests and freeze brands.
 - 6) **Females:** Lots 102 to Lot 136 sell open and OCV. Additional Female Performance Data available next week on DVAuction and Sale Day.
- Use **DVAuction.com** for videos, catalog, and current supplement data and **Angus.org** for the latest EPDs and other resources. Let me know at 620-243-3081 if I can help you in making your selections.

See you at the sale or online, March 15th at 1:00 pm!

Thank you,
Mike Molitor 620-243-3081
